

# Opioid Safety

P: (909) 887-2991 / F: (909) 887-5694  
inlandpainmedicine.com

When opioid therapy is used safely, it can have a major positive impact on a patient's chronic pain and create a better quality of life and function. Our goal at Inland Pain Medicine is to educate our patients and give them a complete understanding of the importance of safety while taking opioids.

Below is a link to an Opioid Safety course. Inland Pain Medicine would like for you to complete this course and the quiz at the end to make sure you have fully understood the information. Please print out the Certificate of Completion and bring it with you to your next appointment.

If you have any questions regarding the information about opioid safety, please do not hesitate to discuss those with your provider.
